Plans for the Victory Loan Drive

Goals

On August 23 Secretary Vinson made public the plans for the Victory Loan Drive, the last great public drive to be held. The total goal for the drive was set at \$11 billion of which \$4 billion is to come from sales to individuals and \$7 billion from other nonbank investors. Of the \$4 billion quota for individuals, \$2 billion was set as the goal for Series E bond sales.

Major emphasis on individuals

As in the last two war loans, the major emphasis throughout the Victory Loan will be placed on sales to individuals. The sales period for individuals will extend from October 29 through December 8. All savings bonds (Series E, F, and G) and savings notes processed through the Federal Reserve Banks between October 29 and December 31 will be credited to the Drive. During this extended period efforts will again be made to enlarge individuals' purchases of Series E bonds through payroll savings plans. It is important to note that although this will be the last large-scale bond drive to be held, the Secretary stated in his announcement that it is essential to continue the payroll savings program in order to finance the continued high expenditures involved in maintaining occupation forces, demobilization, and reconversion.

Subscriptions from all other nonbank investors for marketable securities offered in the Drive will be received from December 3 through December 8.

Securities offered

Seven securities will be offered in the Victory Loan -- four non-marketable and three marketable issues. The four non-marketable securities consist of Series E, F, and G savings bonds and Series C savings notes all of which were available in the 7th War Loan. The three marketable issues, similar to those offered in the last war loan, consist of 7/8% certificates of indebtedness, 2-1/4% Treasury bonds, and 2-1/2% Treasury bonds. The specific maturity dates are summarized in Table 1 at the end of this article.

Commercial banks, except for the limited purchases described below, will not be permitted

to own the 2-1/2% or 2-1/4% Treasury bonds offered in the Drive until within ten years of the respective maturity dates.

The 2-1/2% and 2-1/4% Treasury bonds will be dated November 15, 1945 and the certificates of indebtedness will be dated December 3, 1945. Accrued interest from those dates will be charged on all subscriptions entered and paid for after those dates except subscriptions amounting to \$1,000 or less for the 2-1/4% and 2-1/2% Treasury bonds.

Geographic allocations

To avoid unnecessary transfers of funds from one locality to another, the Treasury again urged that all subscriptions by corporations and firms be entered and paid for through the banking institutions where funds are located. This request was made to prevent disturbance to the money market and the banking situation. The Treasury will undertake, as in the 7th War Loan, to see that statistical credit is given to any locality for such subscriptions as the purchaser may request, except that subscriptions from insurance companies will be credited to the State of the home office as in the past.

Speculative purchases discouraged

In order to help in achieving its objective of selling as many securities as possible outside of the banking system, the Treasury urged the cooperation of all banking institutions in declining to make speculative loans for the purchase of Government securities, and in declining to accept subscriptions from customers which appear to be entered for speculative purposes. The acquisition of outstanding securities by banks on the understanding that a substantially like amount of the new securities will be subscribed for through such banks, thus enabling them to expand their war loan deposit balances, is regarded as an improper practice by the Treasury. The Secretary has requested banking institutions not to make such purchases. The Treasury is in favor of the banks making loans to facilitate permanent investment in Government securities provided such loans are made in accord with the joint statement issued by the National and State Bank Supervisory Authorities on November 23, 1942, in which it was

stated that "subscribers relying upon anticipated income may wish to augment their subscriptions by temporary borrowing from banks. Such loans will not be subject to criticism but should be on a short-term or amortization basis fully repayable within periods not exceeding six months".

The Treasury requested that all nonbank investors refrain from selling securities heretofore acquired to obtain funds to subscribe for the securities offered in the Victory Loan Drive. This request is not intended to preclude normal portfolio adjustments. However, subscriptions by insurance companies and savings institutions will be subjected to limitations which are outlined in the accompanying Table 1.

Deferred payments

Life insurance companies, savings institutions, and States, municipalities, political subdivisions, and similar public corporations, and agencies thereof, will be permitted to make deferred payment, at par and accrued interest, for the 2-1/4% and 2-1/2% marketable bonds allotted to them, up to February 28, 1946.

Concurrent investment of time deposits by commercial banks

During the period from December 3 through December 8, commercial banks (which are defined for this purpose as banks accepting demand deposits) will be afforded an opportunity to invest a

portion of their time deposits in Series F and Series G savings bonds, the 2-1/4% and 2-1/2% Treasury bonds, and the 7/8% certificates offered in the Drive. Such subscriptions are limited to 10% of the combined amount of savings deposits and time certificates of deposit of individuals and nonprofit organizations or \$500,000, whichever is less, except that the aggregate amount of Series F and G savings bonds (Series 1945) held by any bank may not exceed the annual limitation of \$100,000 (issue price). Securities so acquired by the banks will not be included in the Drive nor will they be counted toward any quota.

Special Franklin Delano Roosevelt Bond

The special bond in memory of the late President Franklin Delano Roosevelt will first be available at the start of the Victory Loan Drive, when it will be on sale at all agencies authorized to issue Series E savings bonds.

This bond, in the denomination of \$200, with an issue price of \$150, will constitute an additional denomination of Series E bonds, and will have the same terms and attributes as the other denominations.

Table 1, which follows this article, presents a comparison of the features of the various securities offered; Table 2 shows the redemption values and investment yields of the savings bonds and savings notes.

- 1/ Accrued interest will be charged from November 15, 1945 on all purchases of Treasury bonds made after that date and from December 3, 1945 on all purchases of certificates made after that date, except on subscriptions of \$1,000 or less for the 2-1/2% and 2-1/4% Treasury bonds. Subscriptions from others than individuals for the three marketable securities must be accompanied by payment at par and accrued interest to their respective issue dates or to date of later payment.
- 2/ The Treasury is requesting that there be no trading in the new marketable securities until after December 8, 1945.
- 3/ A commercial bank is defined for this purpose as one which accepts demand deposits.
- 4/ Although a commercial bank may make loans on this issue prior to

- the time that it is eligible to purchase the bonds in the market, it must dispose of any bonds acquired during that period by failure of a loan to be paid at maturity.
- 5/ Commercial banks may subscribe concurrently with the Victory Loan, but not as part of the Loan, to the 2-1/2% and 2-1/4% Treasury bonds and 7/8% certificates offered in the Victory Loan and to Series F and G savings bonds. These subscriptions, which will be accepted from December 3 through December 3, will be limited, in the aggregate, to 10% of the combined amount of time certificates of deposit of individuals and non-profit corporations or associations and of savings deposits, but not to exceed \$500,000. Federal Government Expenditures for the Fiscal Years 1940, 1945, and 1946

Secretary of the Treasury Vinson, in connection with his statement on October 1, 1945 before the Ways and Means Committee of the House of Representatives, presented a discussion of Government expenditures for the fiscal years 1940, 1945, and 1946. The 1946 figures are estimates released by the Bureau of the Budget on August 31, 1945. The following is a reprint of Secretary Vinson's statement on Government expenditures.

The table below shows a summary of Federal expenditures by fiscal years for 1940, a pre-war year; 1945, the peak war year; and Budget estimates for 1946, a year of transition from war to peace. The table also includes net receipts and deficits for each of the years.

Total expenditures increased from \$9.3 billion in 1940 to \$100 billion in 1945, and will fall off to about \$66.4 billion in the current fiscal year which ends next June 30.

War activities

In the fiscal year 1945 more than 90 cents out of every dollar spent by the Federal Govern-

ment went to meet the direct costs of the war. According to the revised Budget estimates released August 31, this proportion will drop to about 76 cents. This reduction is the net result of decreased war expenditures and an increase in other expenditures. War expenditures, according to the Budget, will amount to \$50.5 billion in the current fiscal year, compared with \$90.5 billion in 1945, a reduction of about 44%. The estimate for 1946 of \$50.5 billion might seem high at first appraisal in view of the capitulation of Japan just 1-1/2 months after the beginning of the fiscal year. It should be kept in mind, however, that even though billions of dollars of contracts have been and will be cancelled, cash

outlay will remain relatively high for some months. Time is required to demobilize more than 12 million men; probably \$4 billion or \$5 billion will be spent in terminating war contracts; mustering-out pay will require about \$270 for each man discharged; to name some of the factors which will tend to keep expenditures from dropping quickly.

The following shows a rough breakdown for several years of war expenditures, including net war outlays of the Reconstruction Finance Corporation and its affiliates.

	Fiscal years						
	1940	1941	1942	1943	1944	1945	1946 (estimated)
	(in billions of dollars)						
Munitions...	2/	4.5	20.3	55.2	60.2	58.5	21.0

Total war activities expenditures.....	1.7	6.7	28.3	75.3	89.7	90.5	50.5

The classification "munitions" includes not only military type items but also civilian or industrial type products. In fact, the term as used here covers all products except food procured in the continental United States for the armed forces or for lend-lease. The classification "pay and subsistence" consists of pay of the armed forces, dependency allowances, mustering-out pay, subsistence, and travel allowances. "Miscellaneous" includes civilian pay in war agencies, stock piling of critical materials, agricultural lend-lease, payments for United Nations Relief and Rehabilitation Administration, contract-termination payments, and commercial transportation and public utilities relating to troops and equipment in the United States.

Following the fiscal year 1946, war expenditures will, of course, decrease very rapidly, although it is too early at this time to indicate the probable cost in 1947 and thereafter of maintaining the Army and Navy.

Other activities

Expenditures other than war activities in-

creased from \$7.6 billion in 1940 to \$9.5 billion in 1945, while the estimate for 1946 is \$15.9 billion.

In connection with these activities there are two factors of interest: (1) the expenditures in 1946 for certain items are higher than they are expected to be in succeeding years -- notably refunds of taxes, where corporate refunds are at their peak, and the international payments under the Bretton Woods Agreements being at a considerably higher level than expected in the future; and (2) the expenditures for 1946 will be greater than those at the pre-war level in certain instances where they are directly affected by the war, such as for cars, rehabilitation, and hospitalization of war veterans, expenses of the Treasury Department incident to the collection of larger taxes and the management of the war debt, and expenses of the General Accounting Office in connection with the audit and settlement of accounts.

Veterans, refunds, and interest

Expenditures for veterans, refunds, and interest are largely war caused, being sometimes referred to as "aftermath of war". These expenditures amounted to \$1.7 billion in 1940, \$7.4 billion in 1945, and are expected to require \$10.6 billion in 1946, this latter figure representing the all time peak. The estimate for 1946 represents more than a six-fold increase compared with 1940. During the current year these "aftermath of war" items will account for about two-thirds of all Federal "non-war" expenditures.

Total expenditures for veterans' benefits might be at a higher level in the next two or three years than the \$3.2 billion now forecast for the current year due largely to the educational and readjustment allowance programs. However, these programs, as well as the Government's contribution to the National Service Life Insurance Fund, should be substantially reduced in later years.

The fiscal year 1946 is probably the peak year for refunds of taxes, the estimated expenditures for this purpose amounting to \$2.9 billion. This is due principally to the provisions of the Tax Adjustment Act of 1945 speeding up corporate refunds following the end of the war. It is believed that both corporate refunds and refunds arising from individual withholding will decrease

2/ Breakdown not available.

substantially below the current year level.

Expenditures for interest on the public debt will no doubt increase from the level of \$4.5 billion estimated for 1946, the Budget estimate of total public debt outstanding on June 30, 1946, being \$273 billion. The extent to which interest payments increase or decrease in the future will depend upon the rapidity with which the Government can balance its Budget.

Unemployment relief

The Budget estimates for the fiscal year 1946 do not contain any provision for unemployment relief. In 1940 expenditures for unemployment relief amounted to \$2.2 billion, about \$1.5 billion of this sum having been expended by the Work Projects Administration. The balance of the program took the form of aids to youth by the Civilian Conservation Corps and the National Youth Administration, and loans and grants to States, municipalities, etc. by the Public Works Administration.

International finance

Budgetary expenditures for international finance, that is subscriptions to the International Monetary Fund, International Bank for Reconstruction and Development, and capital stock of the Export-Import Bank, are estimated to aggregate \$2.3 billion for the fiscal year 1946. This excludes \$1.8 billion to be subscribed to the International Monetary Fund out of the United States Exchange Stabilization Fund created by the Gold Reserve Act of 1934. The breakdown for the fiscal year 1946 follows.

	Amount author- ized	Estimated pay- ments in 1946	
		Budget- ary items	From Ex- change Stabili- zation Fund
(In millions of dollars)			
International Monetary Fund.....	2,750	950	1,800
International Bank for Reconstruction and Development.....	3,175	317	-
Export-Import Bank, capital stock.....	999	999 ^{1/}	-
Total.....	<u>6,924</u>	<u>2,266</u>	<u>1,800</u>

^{1/} Includes \$174 million to be paid to the Reconstruction Finance Corporation to retire capital stock previously subscribed by that corporation.

As will be seen from the above table, membership of the United States in the International Monetary Fund will require subscription of \$2,750 million, payment for all of which is expected to be made by June 30, 1946. Also, on the basis of Budget estimates, payment for the full remaining authorized capital of the Export-Import Bank of \$999 million is expected to be made by the end of this fiscal year, which, together with \$1 million of stock already owned by the United States, will give that bank capital stock of \$1,000 million. In addition the Export-Import Bank may borrow not to exceed \$2,500 million from the Treasury to carry on its authorized program. It is not believed that any of this latter amount will be required until after the fiscal year 1946. With regard to the International Bank for Reconstruction and Development Congress has authorized subscription for capital stock by the United States to a total of \$3,175 million, of which \$317 million is estimated to be paid in the fiscal year 1946 and about the same amount again in 1947. The remaining \$2,540 million can be called only when needed to meet the proportionate share of any losses suffered by the bank in the course of its operations.

Other expenditures

The balance of expenditures, under the classification "Other activities", consists of (1) the budgetary items: aids to agriculture, public works, social security and railroad retirement, the Government's contributions to employees' retirement funds and the regular operating expenses of the various departments and establishments; and (2) net outlays of Government corporations and credit agencies other than war expenditures of the Reconstruction Finance Corporation and its affiliates. The budgetary items amounted to an aggregate of \$3.4 billion in 1940, \$3.0 billion in 1945, and, although there are various internal shifts, are expected to again amount to \$3.4 billion in 1946.

Expenditures for aids to agriculture, including administrative and other expenditures of the Department of Agriculture classified in Daily Treasury statements as "departmental", amounted to \$1,571 million in the fiscal year 1940 compared with the Budget estimate for 1946 of about \$700 million, a reduction of \$871 million.

Expenditures for principal items of a continuing public works character amounted to \$571

million in 1940, while in 1945, due to postponements on account of the war, they aggregated less than half of that amount. Such expenditures are estimated to be about \$400 million in the current year. These items are likely to increase in the immediate future as Congress has already authorized additional outlays for public roads, and rivers and harbors and flood control.

Expenditures of the Social Security and Railroad Retirement Boards increased from an aggregate of \$493 million in 1940 to \$779 million in 1945 and for 1946 are estimated at about \$875 million. Increased grants to States for old-age assistance, aid to dependent children, aid to the blind, and transfers to the Railroad Retirement Account are responsible for the higher level of expenditures in 1945 compared with 1940. The grants to States are estimated to be still higher in the current year, while transfers to the Railroad Retirement Account will be slightly lower.

The balance of Budgetary expenditures -- "General administration, etc." -- represent for the most part the regular operating costs of the various departments and establishments of the Government. These expenditures amounted to \$814 million in 1940, \$1,174 million in 1945, and

are estimated at about \$1,400 million for 1946. These expenditures do not include costs of administration of "War activities", "Veterans' Administration", "Aids to agriculture", "Public works", and "Social Security and Railroad Retirement Boards".

The outlays of Government corporations and credit agencies represent transactions in checking accounts maintained with the Treasurer of the United States and are stated net, i.e., gross payments by the agencies less their gross receipts. In 1940 net expenditures of these corporations and agencies amounted to \$254 million compared with net collections of \$846 million in 1945. In 1946 net collections are expected to be about \$400 million. Since the war began liquidations of loans of such organizations as the Reconstruction Finance Corporation, the Home Owners' Loan Corporation and the Federal Farm Mortgage Corporation have proceeded at a faster pace, resulting in total net receipts rather than net expenditures as in earlier years in this category. The lower net receipts in 1946 compared with 1945 is due principally to an expected increase in net expenditures of the Commodity Credit Corporation in the current fiscal year.

Note: - The classifications used in this article differ to some extent from those used in the statistical section of the Bulletin. The most important difference is that figures on net outlays of Government corporations are included, as contrasted with figures on pages 2 through 10 which cover only budgetary expenditures.

Treasury Market Financing

On August 20, 1945 the Secretary of the Treasury announced the offering of an issue of 1-year, 7/8% certificates of indebtedness, to mature September 1, 1946, in exchange for the certificates of indebtedness maturing September 1, 1945 and the 2-3/4% Treasury bonds of 1945-47, called for redemption on September 15, 1945. The new certificates were available in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

Subscription books were open August 20-22, except for the receipt of subscriptions from holders of \$100,000 or less of the maturing certificates or the called bonds. The books were open August 20-25 for subscriptions from the

latter class of holders.

Details on the results of the exchange are shown in the following table.

Source: Actual receipts and expenditures come from Daily Treasury Statements; source of estimated figures is explained in footnote 1.

1/ Less than \$500,000.

2/ Based upon Budget estimates as revised August 31, 1945. Classifications herein are based upon data susceptible of segregation according to Daily Treasury Statements and will not necessarily agree with classifications in Budget document.

3/ For further details, see following chapter, Tables 1 and 2.

4/ Includes receipts from taxes withheld by employers under the Revenue Act of 1942 and Current Tax Payment Act of 1943.

5/ Includes chiefly alcoholic beverage taxes, tobacco taxes, manufacturers' and retailers' excise taxes, and estate taxes.

6/ Includes deposits resulting from the renegotiation of war contracts. Information on the amount of such deposits is not available on the basis of Daily Treasury Statements. On the basis of covering warrants, such deposits were as follows: fiscal year 1943, \$558 million; fiscal year 1944, \$2,235 million (of which \$113 million represents a voluntary return of excess profits); fiscal year 1945, \$2,041 million (of which \$814 million represents a voluntary return of excess profits).

7/ Excludes expenditures for public debt retirements which are charge-

able to the sinking fund, etc. under special provisions of law. For further details regarding expenditures see following chapter, Tables 1 and 2.

8/ Includes transfers to trust accounts, etc.

9/ Includes expenditures for public works undertaken by Veterans' Administration.

10/ "Refunds of taxes" include amounts transferred to public debt accounts to cover issuance of excess profits tax refund bonds and exclude refunds of taxes under the social security program. For discussion of excess profits tax refund bonds, see following chapter, Table 3.

11/ Includes railroad retirement and railroad unemployment activities and excludes expenditures made by Office for Emergency Management, War Manpower Commission (U. S. Employment Service) under authority of the Social Security Act.

12/ Comprises \$950 million for payments to International Monetary Fund; \$317 million for payments for capital stock of International Bank for Reconstruction and Development; and \$999 million for payments for capital stock of Export-Import Bank. The first amount excludes \$1,800 million to be paid from Exchange Stabilization Fund. The third amount excludes \$1 million of common stock heretofore issued by Export-Import Bank and purchased by the United States.

Back Figures: For monthly data for the period July 1941 through July 1944, see "Treasury Bulletin" for September 1945, pages 6 and 7.

r Revised to adjust classification.

• Less than \$500,000.

1/ General expenditures now include expenditures for revolving funds; back figures have been revised accordingly.

2/ Includes public works undertaken by the Veterans' Administration.

3/ Does not include transfers to trust accounts, etc. These are shown in Table 5.

4/ "Refunds of taxes" include amounts transferred to public debt accounts to cover use of excess profits tax refund bonds and exclude refunds of taxes under the Social security program. Excess profits tax refund bonds were formerly issued to corporations entitling them to a post-war credit equal to 10% of the excess profits tax paid. The Tax Adjustment Act of 1945 reduced by 10% the amount of excess profits tax to be paid and abolished the post-war credit. For amounts of excess profits tax refund bonds issued, see the first table in chapter entitled "Public Debt and Guaranteed Obligations of the United States Government". Outstanding excess profits tax refund bonds may be redeemed at the option of the holder commencing January 1, 1946; when such redemptions occur, they will appear as retirements of public debt.

5/ Consists of Administration of Sugar Act of 1937, Agricultural Adjustment Agency, exportation and domestic consumption of agricultural commodities, Farm Credit Administration, Farm Security Administration, Federal Farm Mortgage Corporation, Federal land banks, Rural Electrification Administration, Soil Conservation and Extension Service, Department of Agriculture departmental expenditures, and other.

6/ Includes railroad retirement and railroad unemployment activities

and excludes expenditures made by Office for Emergency Management, War Manpower Commission (U. S. Employment Service) under authority of Social Security Act. For further details, see tables which follow on the Social security program.

1/ Includes public buildings, public highways (including forest roads and trails), river and harbor work and flood control, Tennessee Valley Authority, Federal Public Housing Authority (formerly U. S. Housing Authority), reclamation projects and the Public Works Administration. Excludes certain expenditures for public works in connection with war activities by the Federal Works Agency, beginning July 1941.

8/ Excludes expenditures for the U. S. Maritime Commission, departmental expenditures under the Social security program and the Department of Agriculture departmental expenditures.

9/ For additional information, see "Treasury Bulletin" for August 1945, page 6.

10/ Includes expenditures for the following: Office of Education, and Public Health Service of the Federal Security Agency; Post Office Department postal deficiencies; Federal Housing Administration; Treasury Department investments in Federal savings and loan associations; certain expenditures of the Panama Canal; and capital stock of the Federal Deposit Insurance Corporation, Home Owners' Loan Corporation, Federal home loan banks, and Disaster Loan Corporation. Gross expenditures have been reduced \$160 million representing the repayment of capital funds by certain United States Government agencies. For further details see "Treasury Bulletin" for June 1943, page 9, footnote 12.

12/ Includes \$257 million for restoration of capital impairment of Commodity Credit Corporation applicable to fiscal years 1943 and 1944.

13/ Classified as miscellaneous expenditures commencing July 1, 1945.

• Less than \$50,000.

1/ Formerly Title VIII of the Social Security Act.

2/ Formerly Title IX of the Social Security Act. Includes amounts equal to appropriations to Railroad Unemployment Insurance Administration Fund equivalent to amounts of taxes collected with respect to the period from January 1936 to June 1939, inclusive, from employers subject to the Railroad Unemployment Insurance Act (See Table 3 of Section I).

3/ Prior to January 1, 1940, figures represent amounts transferred to the Old-Age Reserve Account. From January 1 to July 1, 1940 "Transfers" were made to the Federal Old-Age and Survivors Insurance Trust Fund. Subsequently receipts have been deposited in the General Fund of the Treasury and "appropriated" directly to the Federal Old-Age and Survivors Insurance Trust Fund. Amounts shown as transfers reflect deductions made for reimbursement to the General Fund account to cover administrative expenses, which are shown as expenditures in

Section II, Table 1.

4/ Includes only expenditures from appropriations made specifically for administrative expenses relating to the Social Security Act; namely, Social Security Board, Department of Commerce, and Department of Labor; and administrative expenses reimbursed to the General Fund of the Treasury under Section 201 (f) of the Social Security Act, as amended. Beginning July 1, 1940, includes also administrative expenses under the Wagner-Peyser Act. Includes administrative expenses payable from other appropriations, principally for the following agencies: Bureau of Internal Revenue of the Treasury Department, and Public Health Service and Office of Education of the Federal Security Agency.

5/ Covered by appropriations by Congress.

6/ Second Deficiency Appropriation Act, fiscal year 1938, appropriated \$41 million for refunding to certain States portions of Federal employers' tax for 1936 collected under the Social Security Act.

^{1/} Consists of appropriations and net contract authorizations available on and after July 1, 1940. Excludes: (1) authorizations of the Reconstruction Finance Corporation and its affiliates for war purposes, and (2) unexpended balances of appropriations on June 30, 1940 (except immediately available funds from fiscal year 1941 appropriations), available for expenditure in the fiscal year 1941.

^{2/} Contract authorizations have been reduced by later appropriations which were earmarked in authorizing acts for this purpose.

^{3/} Represents the net amount of contractual authority that the President may authorize in accordance with provisions of this act.

^{4/} Includes appropriations made available for prior years. For amounts, see appropriate footnotes in "Treasury Bulletin" for August, 1945, pages 15 and 16.

^{5/} Unappropriated contract authorizations for the naval expansion program are as follows:

Public Law No. 441.....\$2,171,000,000
Public Law No. 204 (Estimated by Navy Department) 1,031,314,662
Public Law No. 375.....55,000,000
Public Law No. 375 (Estimated by Navy Department) 1,825,000,000
Public Law No. 529.....60,000,000.

^{6/} Public Law No. 352 has been reduced by \$30,257,572 representing the amount repealed by Congress and carried to the surplus fund in accordance with provisions of this act.

^{7/} Includes \$180,000,000 for the fiscal year 1945.

^{8/} Represents amount of prior appropriations repealed by Congress. The repeal of contractual authority has been applied to prior acts. For details of appropriations made by 76th Congress, Third Session, see "Treasury Bulletin" for March, 1944, page 5.

^{10/} Includes actual transfer of balances of the Bureau of Marine Inspection and Navigation from the Department of Commerce to Coast Guard, Navy, in the amount of \$1,153,802 in accordance with Executive Order 9083, dated February 28, 1942. Also includes \$25,796,863.57 received as war contributions under authority of the Second War Powers Act and deposits of advance payments made by foreign governments to the Defense Aid Special Fund for the procurement of defense articles amounting to \$135,084,836.36.

* Less than \$500,000.

1/ This is the net budgetary deficit. Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law.

2/ This represents the increase in the gross public debt, except as noted. (See footnote 6.)

3/ Comprised Federal Old-Age and Survivors Insurance Trust Fund, National Service Life Insurance Fund, Unemployment Trust Fund, Railroad Retirement Account, Government Insurance and Retirement Funds and other trust accounts. (See footnote 5.)

4/ Charges for retirement of national bank notes are reflected in this statement directly against increment on gold, in the years during which the retirements were actually made. (See footnote 6.)

5/ Comprised Public Works Administration revolving fund, special deposits (net), and, during the fiscal years 1940 through 1945, transactions in commodity food stamps by the Department of Agriculture. Commencing July 1, 1945, such transactions are classified in the column "Trust accounts".

6/ Expenditures for the retirement of national bank notes from increment on gold for the fiscal years 1936 to 1939 (as shown below) are not reflected herein, but are reflected under increment on gold as follows: 1936, \$397 million; 1937, \$99 million; 1938, \$51 million; and 1939, \$5 million. The increases in the public debt shown in the table "Means of Financing Cash Requirements" for the above fiscal years will not agree for the reason stated above.

7/ Includes inactive gold in the amount of \$1,087 million.

^{1/} Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the annual interest charge and rate of^{2/}

interest on United States savings bonds, Series A-E are considered to yield 2.90% per annum and Series F is considered to yield 2.53%. Guaranteed securities held by the Treasury, and securities guaranteed as to interest only, are not included in this table.

Statutory Limitation on the Public Debt

Section 21 of the Second Liberty Bond Act, as amended, provides that the face amount of obligations issued under authority of that Act, and the face amount of obligations guaranteed as to principal and

interest by the United States (except such guaranteed obligations as may be held by the Secretary of the Treasury), shall not exceed in the aggregate \$300 billion outstanding at any one time.

^{1/} Excludes (1) postal savings bonds and (2) Federal Housing Administration debentures (the only interest-bearing public marketable guaranteed securities outstanding).

^{2/} It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities.

^{3/} Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom. "Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates.

r

Revised.

1/

In the case of the reopening of a previously offered security, the

period to first call and to maturity are calculated from the date

interest commences on the reopening.

2/

Restricted issues are those which commercial banks (defined for this

purpose as banks which accept demand deposits) are not permitted to

acquire prior to a specified date, with two exceptions: (1) concu-

rently with the 4th, 5th, and 6th War Loans and the Victory Loan,

commercial banks were permitted to subscribe to the restricted issue

offered in the loan for limited investment of their savings de-

posits; (2) commercial banks may temporarily acquire restricted is-

ssues through foreclosure when such issues have been used as

collateral.

3/

Consists of all public cash subscriptions and of subscriptions by

U. S. Government agencies and trust funds.

Reopening of previously offered security.

Interest commenced on October 15, 1943.

Announcement of exchange offering was included in announcement of

Third War Loan, August 16, 1943.

Figures on amount of War Loan securities issued consist both of

amounts issued in connection with the Drive, and of amounts issued

concurrently with Drive to commercial banks and to Treasury invest-

ment accounts.

Interest commenced on March 15, 1944.

Interest commenced on June 26, 1944.

Interest commenced on September 15, 1944.

This is the same security that was offered in the Sixth War Loan.

Exchanged as of December 15, 1944 and accrued interest charged from

December 1 to December 15.

Amounts not yet available.

Less than \$50,000.

1/ At current redemption values except Series G, which is stated at par.

2/ Estimated, except for Series G.

3/ For details concerning investment yields and redemption values, see "Treasury Bulletin" for May 1945, page A-4.

4/ Commercial bank purchases were permitted prior to April 1, 1940, and are estimated to have aggregated about \$300 million.

5/ Not yet available.

6/ Series A-D, sold between March 1935 and April 1941, are 10 year discount bonds sold at 75% of maturity value, yielding 2.90% per annum if held to maturity; purchases were limited to \$7,500 issue price in any calendar year and from April 1, 1940, could be made only by individuals. Series A bonds began to mature in March 1945. For information on the approximate monthly distribution of maturities during 1945 see "Treasury Bulletin" for March 1945, page A-2. The small amounts of matured bonds which have not been redeemed remain in the amount outstanding.

7/ There were \$130.5 million of Series A-D and E savings bonds redeemed through August 31, 1945 which had not been identified by series. For purposes of this table, it has been assumed that all of these were Series E bonds.

8/ Series E, on sale since May 1, 1941, is a 10 year discount bond

sold at 75% of maturity value, yielding 2.90% per annum if held to maturity; purchases are limited to \$7,500 issue price in any calendar year and may be made only by individuals. Series F and G have been on sale since May 1, 1941. Series F is a 12 year discount bond sold at 74% of maturity value, yielding 2.5% per annum if held to maturity. Series G is a 12 year current income bond, sold at par, bearing interest at the rate of 2-1/2% per annum, redeemable at par on maturity or at stated prices less than par before maturity. Purchases of Series F and G combined in any one calendar year are limited to \$100,000 issue price (\$50,000 in calendar year 1941). Commercial banks were permitted to purchase Series F and G bonds during the calendar year 1944 under certain conditions ("Treasury Bulletin" for December 1944, page 36, footnote 9); and from June 18 through June 30, 1945 they were again permitted to make such purchases, subject to the following limitations: (1) purchases of Series F and G bonds from June 18 through June 30 were not to exceed the annual limit of \$100,000; and (2) combined purchases of Series F and G bonds, 1-1/2% Treasury bonds due 12/15/50, and 7/8% certificates of indebtedness due 6/1/46 may not exceed 10% of the combined amount of time certificates of deposit of individuals and non-profit corporations or associations and of savings deposits, or \$500,000, whichever may be less.

^{1/} It should be noted that State figures presented in this table are not necessarily comparable with sales data by States inasmuch as bonds which have been purchased in one State may have been redeemed in another. Moreover, the figures shown in this table are based on

current redemption values, whereas the sales figures are shown at issue price. Data on redemptions by States are not available prior to October 1944.

^{2/} Includes Series A bonds which have matured and which have been retired.

* Less than \$50,000.

- ^{1/} These notes were originally designed to help taxpayers set aside funds with which to pay taxes and were known as Treasury tax savings notes. Series A notes were designed for the small and moderate taxpayer; Series B and Series C notes were intended for the large taxpayer. When the collection of taxes through withholding at the source commenced, the need for Series A tax savings notes disappeared and their sale was discontinued. Redemption provisions of Series A notes were relaxed to provide for the payment of interest on notes thereafter redeemed for cash (see footnote 3). Sales of Series C notes, which were designed for the investment of idle cash reserves as well as for the accumulation of tax reserves, was continued and the notes were designated Treasury savings notes.
- ^{2/} Includes matured Treasury savings notes.
- ^{3/} Series A notes, which were sold from August 1, 1941 through June 22, 1943, yield approximately 1.92% per annum. Through June 22, 1943, the notes could be redeemed for cash only at the original purchase price; since that date, the notes have been redeemed for cash at

the tax payment value current at the time of presentation. (See also footnote 1.) Prior to October 4, 1943, the maximum amount which could be used in payment of each class of tax (income, estate, or gift) by each taxpayer during each taxable year was limited to \$5,000 par value; this limitation was removed as of that date.

- ^{4/} Series B notes were sold from August 1, 1941 through September 12, 1942, to yield approximately 0.48% per annum. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash only at the original purchase price.

- ^{5/} Series C notes went on sale September 14, 1942. Interest accrues each month on a graduated scale (see "Treasury Bulletin" for August 1943, page 4) to yield approximately 1.07% per annum if held to maturity. These notes may be used in payment of Federal taxes at any time two months after the date of issue. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash six months after the date of issue at the tax payment value current at the time of presentation. Prior to July 27, 1943, notice of 30 days was required for cash redemption. See also footnote 1.

Back Figures: The Treasury Survey commenced with data for March 31, 1941 and has been published regularly in the "Treasury Bulletin" since May 1941. Revisions of data for September 30, 1944 appeared in the February 1945 issue, page 53; reclassification of data on banks for the period November 1943 through February 1944 appeared in the May 1944 issue, pages 52-57; revisions of data on insurance companies for May 31, 1943 and prior months appeared in the November 1943 issue, pages 52-63.

* Less than \$500,000 or less than .05%.

1/ Securities held in trust departments are excluded.

2/ Includes trust companies.

3/ This column includes securities held by those banks and insurance companies which are not covered in the Treasury Survey. See heading to this section.

4/ Guaranteed securities held by the Treasury are not included.

5/ Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom. "Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates.

6/ Includes an estimated amount of Federal Housing Administration debentures.

7/ Actual figures by tax status are unavailable.

* Less than \$500,000.

- $\frac{1}{1}$ United States savings bonds, Series A-D, E, and F are shown at current redemption values. They were reported at maturity value by the banks and insurance companies covered in the Treasury Survey but have been adjusted to current redemption values for use in this statement.
- $\frac{2}{2}$ Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom. "Wholly" tax-exempt securities are exempt from both the normal and surtax rates. "Partially" tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of prin-

cipal amount owned by any one holder is also exempt from the surtax rates. "Taxable" securities are subject to both normal and surtax rates.

$\frac{3}{3}$ Securities held in trust departments are excluded.

$\frac{4}{4}$ Includes trust companies.

$\frac{5}{5}$ This column includes securities held by those banks and insurance companies which are not covered in the Treasury Survey. See headnote to this section.

$\frac{6}{6}$ Series A-D savings bonds sold prior to March 1, 1941 are partially tax-exempt; those sold on and after that date are taxable.

$\frac{7}{7}$ Guaranteed securities held by the Treasury are not included.

^{1/} Excludes Federal Housing Administration debentures.

^{2/} When the price of a security is such as to result in a negative yield, the excess of price over zero yield is given in the yield columns in thirty-seconds.

^{3/} Prices represent the mean of closing bid and ask quotations in the over-the-counter market except that prices of Treasury bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. "When issued" prices are included beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.

^{4/} Market convention treats the yield to earliest call date as more

significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par. Included in the average of long-term taxable Treasury bonds (see page 59).

^{5/} Quoted on a yield basis.

^{7/} Not quoted on August 31; quoted on a price basis at par beginning August 22, 1945.

^{8/} Called on May 14 for redemption on September 15, 1945.

^{9/} This is the only bond eligible to remain in the average of long-term partially tax-exempt Treasury bonds (see page 59).

^{10/} Excludes postal savings bonds.

- 1/ When the price of a security is such as to result in a negative yield, the excess of price over zero yield is given in the yield column in thirty-seconds.
- 2/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market. "When issued" prices for all securities except Federal Intermediate Credit Bank debentures are included beginning November 1, 1941. Dates of highs and lows, in case of recurrence, are the latest dates.

- 3/ Market convention treats the yield to earliest call date as more significant when an issue is selling above par; the yield to maturity as more significant when an issue is selling at or below par.
- 4/ Prices quoted are subject to a dealer's commission. These securities are not shown until date of issue.
- 5/ Excludes issues completely held by Farm Credit Administration agencies.

YIELDS OF TREASURY SECURITIES AUG. 31, 1945

Based on Mean of Closing Bid and Asked Quotations

Explanation The points represent yields to call date when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

Basis of Computation: (1) Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

Back Figures: Monthly and weekly data for the period January 1933 through March 1944 appeared in the "Treasury Bulletin" for April 1944, pages 57-61.

1/ Average of Treasury bonds neither due nor callable for fifteen years. For discussion of composition of average see "Treasury Bulletin" for March 1944, page 58. Partially tax-exempt bonds are those the interest on which is exempt from the normal rates of the Federal income tax, except that in the case of partially tax-exempt

Treasury and United States savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates of the Federal income tax. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax.

2/ For discussion of present composition of high-grade corporate bond average, see "Treasury Bulletin" for January 1945, page 56; for discussion of its previous composition, as well as the considerations underlying its construction, see "Treasury Bulletin" for April 1943, page 61.

3/ Monthly averages of daily figures. Prior to April 1, 1938, corporate bonds are averages of Saturday figures.

4/ The composition of the high-grade corporate bond average was revised commencing with November 1, 1944. The old average for November 1944 was 2.564. See footnote 2.

5/ On days when the exchanges are closed, the date and prices of the previous day are used.
